Address _____

Email _____

Allergies/Health Concerns _____

Emergency Contact People (Name and Phone Number)

1. _____

2. _____

3. _____

Authorized people to pick up your child from camp:

1. _____

2. _____

3. _____

Out of This World June 24 – 28

Children are naturally curious and outer space is captivating to adults and children alike. Outer space activities are a fantastic stepping stone into STEAM (Science, Technology, Engineering, Art, Math) activities, encourages creative thinking, and appeals to our sense of wonder. We will learn about day and night, the planets, create moonscapes, and hunt for space rocks!

Monday	Tuesday	Wednesday	Thursday	Friday
Build a telescope	Paper Mache Planets	Design a rocketship	Constellations	Astronaut Training

Under the Big Top July 8 – 12

Step right up and join the fun because the circus has come to town! From tightrope walkers to lion tamers, we'll have plenty of fun under our big top. We will play circus games, make a lion's mane, design our own popcorn bucket and more. With bright colors, animals, and lots of movement opportunities, this camp is one you don't want to miss!

Monday	Tuesday	Wednesday	Thursday	Friday
Shredded Paper Lion's Mane	Elephant Toothpaste	Ring Toss, Parachute Games, "Tightrope" Walking	Silly Clown Experiment	Cotton Candy Playdough

Science in Action

July 22 – 26

Science helps children develop an understanding of the world around them through exploration and inquiry. Children learn best by doing and this science camp will encourage children to DO. We will create chemical reactions, use our 5 senses, and investigate properties of matter. We will record our results in a science notebook, just as true scientists do!

Monday	Tuesday	Wednesday	Thursday	Friday
Crystal Formation	Lemon and watercolor science	Fireworks in a Jar	Pop Rocks and Soda Experiment	Science Fair
