

Summer Camps 2023
Little Shepherd Preschool
Ages 3 – 6

Camps will run Monday through Friday, from 9:15 - 11:45. Snack will be provided and all campers must be potty trained. The cost is \$100 per week.

Camps are as follows:

The Art of Eric Carle	June 12 – 16
Wide World of Sports	June 26 – 30
Under the Sea	July 10 – 14
Icky Sticky Science	August 7 – 11

Please indicate below which camps you would like your child to attend:

The Art of Eric Carle	Wide World of Sports	Under the Sea	Icky Sticky Science

Total Due: _____

The Art of Eric Carle June 12 - 16

In addition to being an author of many beloved children’s books, Eric Carle has illustrated more than 70 stories. In our Eric Carle camp, we will investigate the various ways he illustrated his books. Watercolor and tissue paper, along with color mixing techniques, will be explored. Eric Carle stories make it fun to learn about colors, numbers, sharing, feelings, and so much more!

Monday	Tuesday	Wednesday	Thursday	Friday
<i>Today Is Monday:</i> color mixing	<i>Mr. Seahorse:</i> marbled seahorse	<i>A House For Hermit Crab:</i> collage	<i>The Mixed-Up Chameleon:</i> tissue paper art	Art Show

Wide World of Sports June 26 – 30

Offering exposure to different sports can help children figure out which ones they like best. Participating in sports is a fun way for children to learn about teamwork, communication, and the importance of exercise. In this week’s camp, we will focus on a new sport each day. What equipment is needed for golf? What is inside a baseball? Which is heavier, 3 tennis balls or 3 golf balls? We will investigate each of these questions, as well as try each sport.

Monday	Tuesday	Wednesday	Thursday	Friday
Indoor mini golf	Football Toss	See inside a baseball	Shapes on a soccer ball	Field Day

Under the Sea July 10 – 14

Children will discover the wonders of the deep blue sea. What mysteries lie in the ocean? We will find out through games, songs, and stories. During this engaging theme, children will investigate sea life, graph sea creatures, used mixed media to create their own fish, and more!

Monday	Tuesday	Wednesday	Thursday	Friday
Where does sand come from?	Zones of the ocean	Create-a-fish	Salt Water Density Experiment	Beach Party

Icky Sticky Science August 7 – 11

Kids learn by doing. Hands-on science encourages children to DO something – observe, ask questions, smell, touch, experiment. Hands-on science activities give children a chance to engage multiple senses. We will use bubbles to explore surface tension, combine substances to observe chemical reactions, and see the power of the sun's rays.

Monday	Tuesday	Wednesday	Thursday	Friday
Bubble Painting	Elephant Toothpaste	Dish Soap Slime	Sunscreen Paintings	Mentos and Coke Explosion

Child's Name _____

Date of Birth _____

Parent/Guardian Names _____

Phone Number _____

Address _____
